PRODUCT CATALOGUE 2026

European Solid Timber

Beech · Oak · Walnut · Fir

One partner.
A network of producers.

Sourced in Croatia and across Central & Southeast Europe
Export logistics via Port of Rijeka

ABOUT US

One partner.
A network of producers.

Adria Wood Partners is the timber export business developed through Promo Compact d.o.o., a Croatian company based in Samobor. We connect international buyers with selected sawmills and timber producers in Croatia and the wider region.

Instead of relying on one mill, we work with a network of producers to specifications agreed in advance — and act for you as a single, dependable supplier of the grade, dimensions, volume and continuity you need.

Your European sourcing partner — from specification to destination port.

Partner sawmill yard

Reliable supply

A network of regional production partners gives flexibility across species, dimensions and volumes — and removes dependence on a single mill.

Controlled quality

Grade, moisture, dimensions, steaming and packing are agreed with every producer and checked before shipment.

One contact

You work with one Croatian partner while we consolidate supply across producers and manage the export programme.

SPECIES	ORIGIN	EXPORT	START
Beech, Oak, Walnut, Fir	Croatia + regional partner mills	Port of Rijeka, container shipping	Trial lot or one 40′ container

SUPPLY & LOGISTICS

From European forests to your port.

Our supply model combines Croatian origin with a wider network of timber producers in Central and Southeast Europe. Product is consolidated and exported from Croatia, with ocean freight routed primarily through the Port of Rijeka.

Mediterranean · North Africa · Gulf

Reliable supply, built with partners

01 Several selected producers per product, so your programme never depends on one mill.

02 Specifications agreed with each producer before production starts.

03 Volumes consolidated for full containers and repeat monthly programmes.

04 Flexibility across species, dimensions and volumes.

Port of Rijeka

WHY RIJEKA

Rijeka is Croatia's largest maritime port and a core TEN-T port on the Mediterranean Corridor. Its North Adriatic position makes it our natural deep-sea gateway from Central Europe toward Mediterranean, North African and Gulf markets.

QUALITY CONTROL

Quality controlled at the source.

You may never see the mill floor, so our standard has to travel with every order. Each partner producer works to a specification we agree in writing, and we align grade, moisture, dimensions, steaming and packing before the container leaves Croatia.

OUR PARTNER QUALITY STANDARD

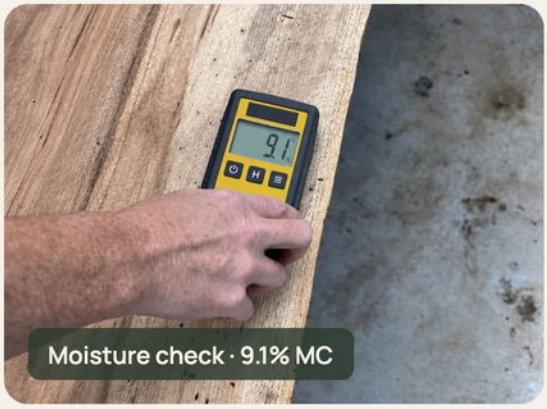

01 **Producer qualification**
Capacity, grading practice, drying and steaming capability are reviewed before a mill joins a programme.

02 **Specification agreement**
Grade rules, red-heart allowance, tolerances and moisture are fixed per quotation.

03 **Production check**
Moisture content, dimensions, steaming and grade are checked during production.

04 **Pre-shipment inspection**
Grade, packing and bundle marking are inspected and recorded before loading.

05 **Loading & documentation**
Container loading and export documents are coordinated through Port of Rijeka.

WITH EACH SHIPMENT

- Agreed order specification
- Pre-shipment inspection record with photos
- Packing list and bundle marking
- Export documents
- [Certificates / legality documentation — confirm scope]

AGREED IN EVERY QUOTATION

Grade rules · red-heart & sapwood allowance · tolerances · moisture target · steaming · packing

PRODUCT RANGE

Four species. One supply programme.

Hardwood and softwood from Croatia and the wider region, specified to your end-use.

European Beech

p. 06

Fagus sylvatica

Core programme · furniture and industrial production

European Oak

p. 07

Quercus robur / Q. petraea

Premium hardwood · furniture, doors, flooring, interiors

European Walnut

p. 08

Juglans regia

Premium, selective · luxury furniture and cabinetry

European Fir

p. 09

Abies alba

Softwood · carpentry, construction, packaging

AT A GLANCE

Species	Thickness	Width	Length	KD	Grades
Beech	26–80 mm	100/120/150 mm+	1.0–4.0 m+	8–12 %	A · AB · B · 70A/30B
Oak	26–80 mm	90/100/120 mm+	2.0 / 2.1 m+	10–12 %	Prime · AB · Joinery · Rustic
Walnut	26–80 mm	100 mm+	2.10 m+	8–12 %	A · AB · B · Character
Fir	16 mm+	50 mm+	0.80–8.00 m	on req.	0-I · AB · II-III · IV-V

CORE PROGRAMME

European Beech

Fagus sylvatica

Versatile, strong and consistent hardwood for furniture and industrial production.

WHY BUYERS CHOOSE IT

Excellent machining and bending characteristics for furniture and components.

Available steamed, lightly steamed or unsteamed to match colour and end-use.

Strong regional availability makes beech suitable for repeat container programmes.

QUALITY OPTIONS

A / Prime · AB · B · 70A / 30B

TYPICAL USES

Furniture · components · bent parts · industrial production

COMMERCIAL SPECIFICATION

Thickness	26 / 32 / 38 / 50 / 60 / 65 / 70 / 80 mm · other sizes on request
Width	100 / 120 / 150 mm+ random · fixed widths on request
Length	1.0–4.0 m+ · export programmes commonly 2.10 m+
Condition	Fresh / AD / KD · typical KD target approx. 8–12 %
Steaming	Steamed · lightly steamed · unsteamed
Format	Edged · square-edged · unedged

Steaming is commercially characteristic for beech. Final grade rules, red-heart allowance, tolerances and moisture are agreed per quotation.

PREMIUM HARDWOOD

European Oak

Quercus robur / Quercus petraea

Durable premium hardwood with distinctive grain for high-value visible applications.

WHY BUYERS CHOOSE IT

Strong visual identity for furniture, doors, flooring and architectural interiors.

Available in clean, joinery and character / rustic selections.

Wide and long boards can be sourced selectively through the partner network.

QUALITY OPTIONS

Prime · AB · Joinery · Rustic

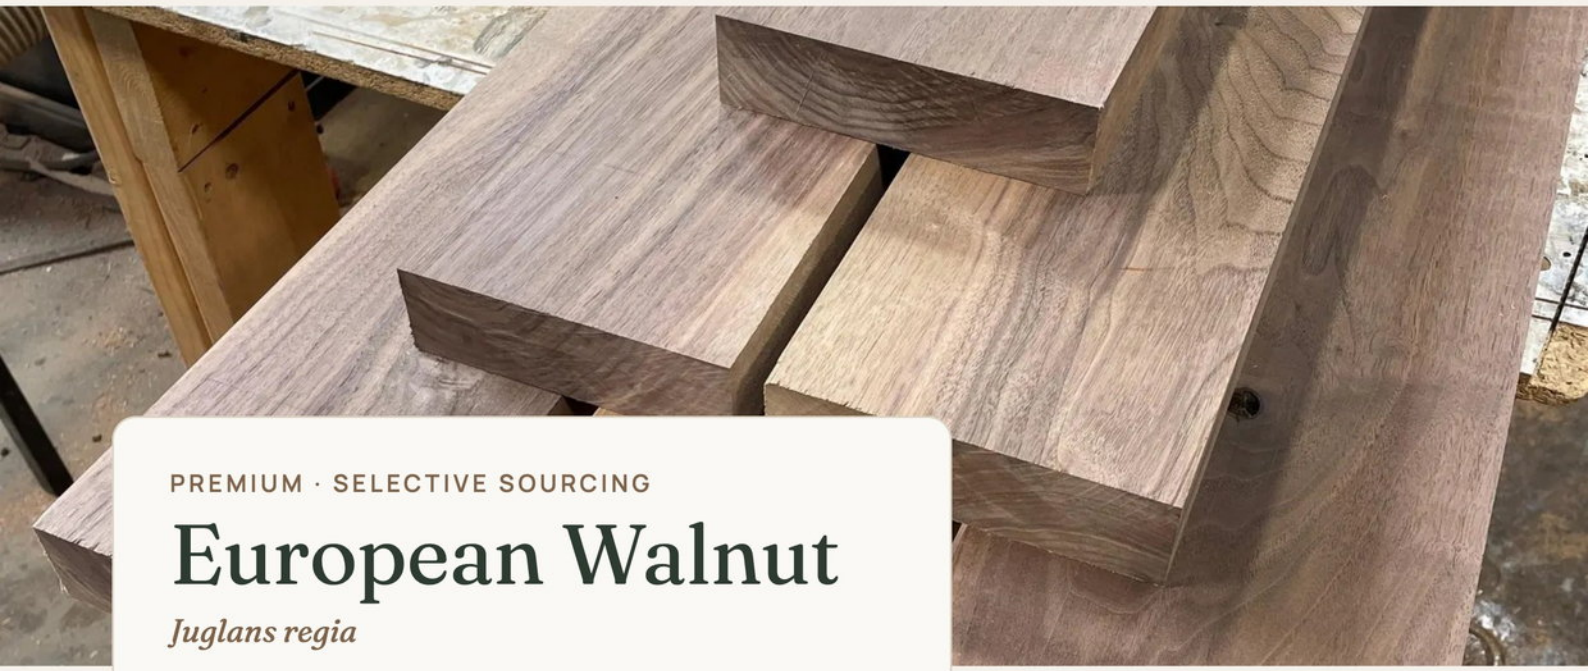

TYPICAL USES

Furniture · doors · flooring · architectural interiors

COMMERCIAL SPECIFICATION

Thickness	26 / 27 / 32 / 38 / 40 / 50–52 / 63–65 / 80 mm
Width	90 / 100 / 120 mm+ random · extra-wide subject to availability
Length	2.0 / 2.1 m+ · shorts and long boards by programme
Condition	Fresh / AD / KD · typical export KD approx. 10–12 %
Cut	Flat · quarter · rift by request
Format	Edged · unedged · boules

Steaming is not normally specified for European oak. Sapwood, knots, checks, cut and visual character are defined in the order specification.

PREMIUM · SELECTIVE SOURCING

European Walnut

Juglans regia

Premium European hardwood for luxury furniture, cabinetry and statement interiors.

WHY BUYERS CHOOSE IT

Rich natural colour and individual grain make each board visually distinctive.

Steamed supply harmonises colour; natural / unsteamed available on request.

Selective sourcing is especially valuable for wider boards and premium grades.

QUALITY OPTIONS

A / Prime · AB · B · Character

TYPICAL USES

Luxury furniture · cabinetry · statement interiors

COMMERCIAL SPECIFICATION

Thickness	26 / 30 / 32 / 38–40 / 50–52 / 60 / 65–70 / 80 mm
Width	100 mm+ random · wider boards subject to log availability
Length	2.10 m+ with fair spread · fixed components by programme
Condition	KD standard for furniture export · target approx. 8–12 %
Steaming	Steamed · natural / unsteamed on request
Format	Edged · unedged · boules · selected fixed-size stock

European walnut is a premium natural product. Colour, sapwood and grain variation are intrinsic; acceptance criteria are confirmed before production.

SOFTWOOD PROGRAMME

European Fir

Abies alba

Light, workable European softwood for carpentry, construction and industrial applications.

WHY BUYERS CHOOSE IT

Efficient weight-to-volume ratio for export and industrial processing.

Flexible dimensional programmes for construction, carpentry and packaging.

Fresh, dried and anti-stain-treated options specified to end-use.

QUALITY OPTIONS

0-I | AB | II-III | IV-V

TYPICAL USES

Carpentry · construction · packaging · industrial processing

COMMERCIAL SPECIFICATION

Thickness	16 mm+ · common 24 / 28 / 32 / 38 / 48 / 50 / 63 mm
Width	50 mm+ · standard and custom fixed widths
Length	0.80–8.00 m depending on programme
Condition	Fresh / AD / KD
Treatment	Anti-stain treatment on request
Format	Rough sawn · edged · custom sections

Steaming is not characteristic for fir. Grade systems vary by producer and application, so visual and structural requirements are confirmed in the RFQ.

SPECIFICATION GUIDE

Terms we use in every quotation.

A shared vocabulary keeps orders precise. Final values are always confirmed in the written quotation.

CONDITION

Fresh	Freshly sawn, not dried
AD	Air-dried
KD	Kiln-dried to an agreed target moisture content

FORMAT

Unedged	Natural (waney) edges left on
Edged	Waney edges sawn off
Square-edged	Edged with parallel, square edges
Boules	Log sawn through, boards kept in sequence

STEAMING & GRADES BY SPECIES

Species	Steaming / treatment	Grades
Beech	Commercially characteristic: steamed, lightly steamed or unsteamed	A/Prime · AB · B · 70A/30B
Oak	Not normally specified	Prime · AB · Joinery · Rustic
Walnut	Steamed to harmonise colour; natural on request	A/Prime · AB · B · Character
Fir	Not characteristic; anti-stain treatment on request	0-I · AB · II-III · IV-V

AGREED PER QUOTATION

Grade rules, red-heart allowance, sapwood, knots, checks, tolerances and moisture. Fir grade systems vary by producer and application and are confirmed in the RFQ.

UNITS & NOTATION

Thickness × width × length
mm · mm · m | volume in m³
“150 mm+” = 150 mm and wider
1 × 40′ = one 40-foot container

HOW TO BUY

Send us the spec. We build the supply.

You don't need to fit your requirement into a fixed catalogue SKU. Tell us the end-use and commercial parameters — we match the order to the most suitable producer or combination of producers.

01 · Species
Beech · Oak · Walnut · Fir

02 · Quality
Grade or visual acceptance criteria

03 · Dimensions
Thickness × width × length

04 · Condition
Fresh · AD · KD · moisture · steaming

05 · Quantity
Trial lot · one container · monthly volume

06 · Destination
Port or delivery point and Incoterm

EXAMPLE ENQUIRY

`European Beech · 70% A / 30% B · 50 mm · width 150 mm+ · length 2.10 m+ · KD · steamed · edged · 1 × 40′ trial container`
